<p>This is extremely strong with sharp teeth.</p>	<p>These are strong so that they can jump high.</p>	<p>These help the monkey to see very well.</p>
<p>These are long and flexible so that they can climb.</p>	<p>These can be small or large and help them to hear all around them.</p>	<p>They use this to smell each other and threats around them.</p>
<p>This is used for balance, leaping vertically and for hanging upside down from branches.</p>	<p>These are used to peel fruits, pick up objects and groom.</p>	<p>They use these to walk on, with their hands on the ground also.</p>

Parts of African Animals

Cut and stick the words to label the parts of an elephant

A baby elephant might hold on to this when it is walking.

An elephant uses this to suck up water and pick up food.

These help to cool an elephant down if it flaps them.

An elephant uses these to dig and find food.

Parts of a Monkey

Write a description of each of the monkey's body parts. Then, cut and stick the labels in the correct place to name each part.

Four empty rectangular boxes with three horizontal lines each are provided for labeling the monkey's body parts. The boxes are connected to the monkey's head, tail, body, and face by thin lines.
