

## Multiply and Divide by 6

4. Maya is organising flowers into 6 vases.

She says,

I have 48 flowers. How many will go in each vase?

Draw the correct number of flowers in vases and complete the calculations below.

A.   $\div$   =

B.   $\times$   =

VF  
HW/Ext

5. Match the calculation to the correct bar model.

A.  $5 \times 6$

B.  $6 \times 6$

C.  $3 \times 6$

1.

2.

3.

VF  
HW/Ext

6. A shopkeeper has 42 apples left to sell. The apples come in packs of 6.

He says,

I have 6 packs of apples left to sell.

Explain the shopkeeper's mistake. Use the bar model to prove it.

## Short Division

**1a. The calculation below is incorrect. Explain why.**

	1	3	2	
7	9	<sup>2</sup> 3	<sup>1</sup> 8	

R

**1b. The calculation below is incorrect. Explain why.**

	1	6	2	
3	4	<sup>1</sup> 5	6	

R

**2a. Use two of the digit cards to create a calculation where the result has six ones. The number being divided must be greater than 215 and less than 600.**

2	3	6
---	---	---

	1		÷	2	=
--	---	--	---	---	---

PS

**2b. Use two of the digit cards to create a calculation where the result has no tens. The number being divided must be greater than 150 and less than 950.**

1	8	9
---	---	---

		2	÷	4	=
--	--	---	---	---	---

PS

**3a. At a conference there are 840 people and tables seat either 6, 7 or 8 people.**

**There are only 125 tables available and the organisers want to use as many tables as possible.**

**How many seats should they use at each table?**

PS

**3b. A school has 612 pupils. The headteacher is organising a treasure hunt and wants to arrange the pupils in groups of 3, 4 or 6.**

**Each group needs a compass and there are only 160 available in the school.**

**How many children should be in each group for the most compasses to be used?**

PS
