

HOW IS CHOCOLATE MADE?

8 Have you ever wondered how chocolate is made?

- 18 1. Firstly, the seeds of the cacao tree form in fruits
20 called pods.
- 31 2. Next, workers cut the pods from the trees and remove the
36 seeds and pulp by hand.
- 48 3. The seeds are left for a few days to develop their flavour
58 before being dried. The dry seeds are also known as
60 cocoa beans.
- 69 4. Then, the beans are roasted and the hard shells
71 are removed.
- 83 5. After that, the beans are ground into a paste and sugar is
89 added to create a sweeter taste.
- 100 6. The chocolate is then slowly heated and cooled to create a
102 glossy finish.
- 112 7. Finally, the mixture is poured into a mould for the
115 chocolate to set.
