## Parts of a Plant

3  
4

7

2

### Across

1. Colourful, delicate part of a flower.
4. Sweet liquid found in flowers that attracts insects.
5. Fine, powdery substance that helps plants reproduce.
7. Green leaf-like structure that protects a flower bud.
8. Part of a plant that absorbs water and nutrients from the soil.

### Down

1. Living organisms that grow in the ground.
2. Flat, green part of a plant that makes food.
3. The part of the stamen where pollen is produced.
6. Part of a flower that becomes a fruit.

# Plant Life Cycles

Amethysts

## Across

3. Plants absorb \_\_\_\_\_ through their roots to help them to grow. (9)

4. An animal or insect which carries pollen between plants. (10)

9. When seeds get spread out so they can grow elsewhere. (4, 9)

10. When pollen is moved from the male anther of a flower to the female stigma. (11)

5. These anchor the plant into the ground and absorb water. (5)

6. This holds the plant upright and carries water to the leaves. (4)

7. These make food for the plant using sunlight and carbon dioxide from the air. (6)

8. When the plant begins to produce flowers. (9)
